Vanish **Messenger**
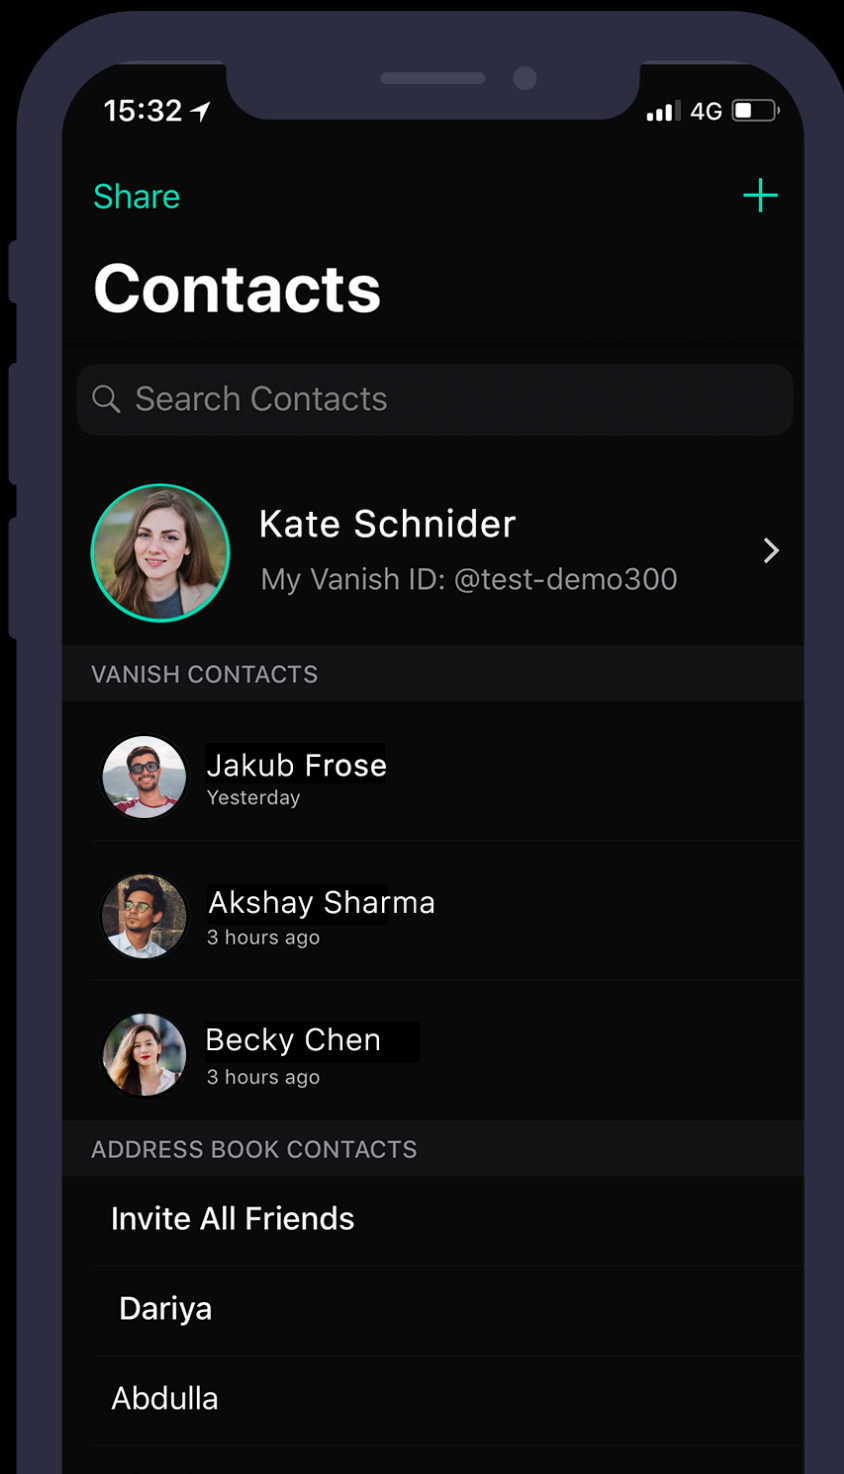

Communicate digitally with the same level of security and privacy as a face-to-face conversation.
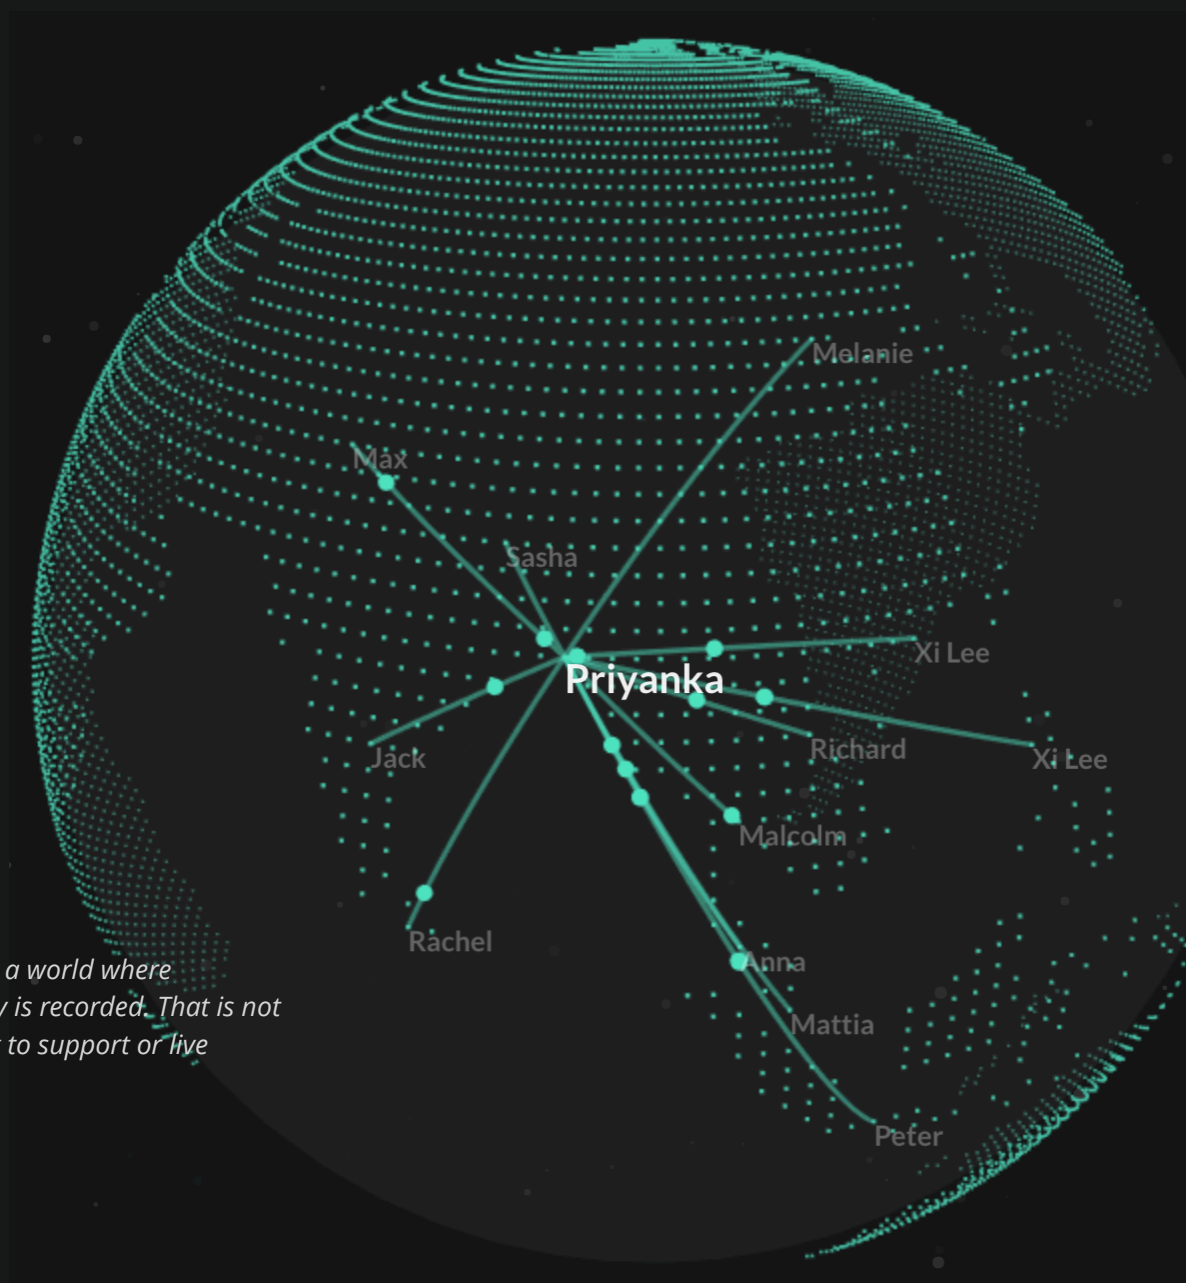

Why Vanish **Messenger ?**

Overview

Vanish Messenger allows for secure and private communication. Your messages and calls are secured so only you and the person you're communicating with can access them, and nobody in between, not even Disappears.

You can also erase your messages off other people's phones and have video calls in groups. Available on iOS & Android.

I do not want to live in a world where everything I do and say is recorded. That is not something I am willing to support or live under.

- Edward Snowden

Vanish **Messenger Features**

End-to-End Encryption

Vanish end-to-end encrypts all your communication including messages, photos, calls, group calls, and even status times. Only the intended recipient, and nobody else can read your messages. *(United States Provisional Patent Application No. 62/609,172)*

Message Retraction

Vanish allows you to send messages and erase them off the user's device indefinitely, making them as private as the spoken word.

Group Audio & Video Calls

Vanish makes secure communication easy and fun. With audio calls with up to 20,000 participants and video calls with up to 7.

Additional Functionality

Blockstore (Blockchain File Storage)

Introducing Blockstore powered by the peer to peer protocol IPFS, each file is stored using patent pending encryption in a decentralised manner. The hash of the file is subsequently stored on the blockchain. Allowing for "storing", encrypting, and sharing large data and files on the blockchain. Coming to Vanish Messenger soon to allow for added data security and protection.

The main event isn't bitcoin. It's using the blockchain to disrupt other industries and Wall Street.

Screenshot Detection

By using our patent pending machine learning model, Disappears has developed technology to detect screenshots from devices placed above the screen. (United States Provisional Patent Application No. 62/609,185)

Quotes from the **Founders**

"The concept with Disappears is to power secure communication across the globe where others have failed and work towards a more decentralised internet."

Jordan Sidoo

Co-Founder of Disappears.com, Inc.

"The market opportunity continues to exist in the security space, with strategic shareholders in place we believe we can continue to grow Disappears and advance our technologies in Artificial Intelligence, Security, and Blockchain"

Dylan Sidoo

Co-Founder and COO of Disappears.com, Inc.

"With our machine learning powered screenshot detection capabilities, we are excited to provide new ways for users to better protect there communication and ensure it stays private. "

Jaiten Gill

Co-Founder and CEO of Disappears.com Inc.
